DETAILED ACTION

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 12, and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by **Sugaya et al (6,394,797)**. **Sugaya et al** discloses a thermal process station having a process chamber (13) in which a heated platen (2) is positioned (the heated platen is heated by thermoregulator (7)), the heated platen having a face in which a workpiece (1) rests; **Sugaya et al** furthermore teaches an additional enclosed chamber (11, 24, 26) having an additional heat source (23) with a heating face opposed to the heated platen, the workpiece positioned between.

Claims 1-4, 6, 7, 9, 12, 18, and 20-23 are rejected under 35 U.S.C. 102(e) as being anticipated by **Shirakawa et al (6,644,964)**. **Shirakawa et al** discloses a thermal process station (440) having an enclosed process chamber (219) in which a heated platen (231) is positioned, the heated platen has a face in which workpiece (W) rests, an additional enclosed chamber (220) in which an additional planar heat source (221) is positioned, opposed to the heated platen. A lid assembly includes the additional enclosed chamber (220), an inlet plenum system (242) and a headspace above top

surface of planar heat source (SEE Figures 8A & 8B), and part of an exhaust port (243).
The inlet side of the system comprises a plurality of radial flow channels (222).

Allowable Subject Matter

Claims 13-17 are allowed.

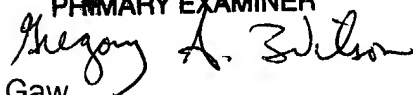

Claims 5, 8, 10, 11, and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
